HOW TO MAKE A BUTTON TEMPLATE

STEP 1

Go to ButtonMakers.net.

Select the "Design" tab then "Photoshop Templates".

Download the 2" Photoshop zip file.
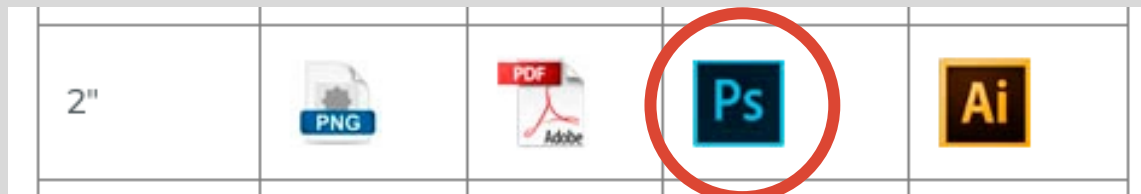

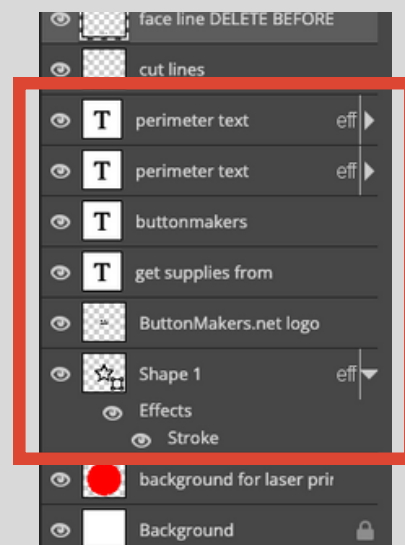

STEP 2

Go to Photopea.com.

Select "Open from Computer". Open the saved Photoshop file and select the "200.psd" document.

200.psd
200page.psd

STEP 3

Use your Delete key to remove all the other layers shown here.

Go to the File tab and select "Open & Place". Select your button image.

STEP 4

Make sure the button and and background layers are one atop another. Select both layers, then select the Link icon located at the bottom of the panel. Once linked, select the Button layer, right-click and select "Clipping Mask". The image will fit the button.

Link icon
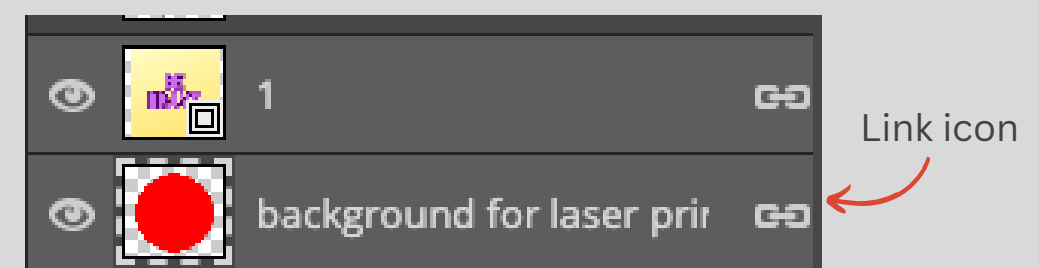

STEP 5

Select the Eye symbol to hide the "face line DELETE BEFORE" to hide the layer.

face line DELETE BEFORE

Go to the Edit tab, select "Define New" and "Pattern". Your button image will be saved.

STEP 6

Go to the File tab and "Open" the other zip file document.

200.psd
200page.psd

Delete or hide the Instructions layer.

instructions
Background

STEP 7

Under the Edit tab, go to "Fill" and from the dropdown select "Pattern". Click on the default image, find your button, then OK.

Default image

Fill
Fill: Pattern

Your image should populate the multiple button page. Go to the File tab and export as a JPEG.
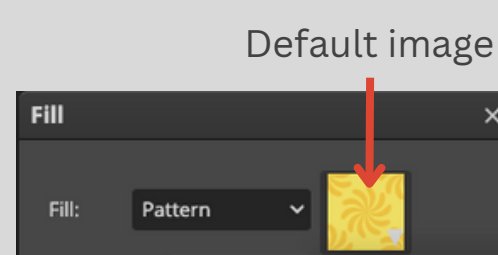

STEP 8

To print the page, go to the File tab and select "New". Select the Print tab and choose 8.5 x 11" page size. Select "Create".

Go to the File tab, select "Open & Place" and choose the exported JPEG. Export the document in the file format of your choice.
